01

# INTERIOR DESIGN

This service primarily refers to interiors-related activity – where we offer elaborate space planning, design aesthetics, interior fit outs, technology & utility arrangements and value-additions as works best for a given space. Our repertoire in Interior Design spans across all types of business & domestic spaces – from offices, IT or technologylinked centers, hotel & hospitality facilities, shopping & retail facilities to all type of residential spaces.

Space Planning

Design Aesthetics

Interior Fit Outs

Technology Integration

Utility Arrangements

02

# ARCHITECTURE

We provide you the architectural consultancy right from designing by suggesting different options as per requirements given by the client and once the sketch or concept / design is finalised by mutual consent we further go for approval from the competent authorities. At the time of designing only we keep guiding our client regarding local bylaws and keep them update in change if any.

Concept Design

Detailed Planning

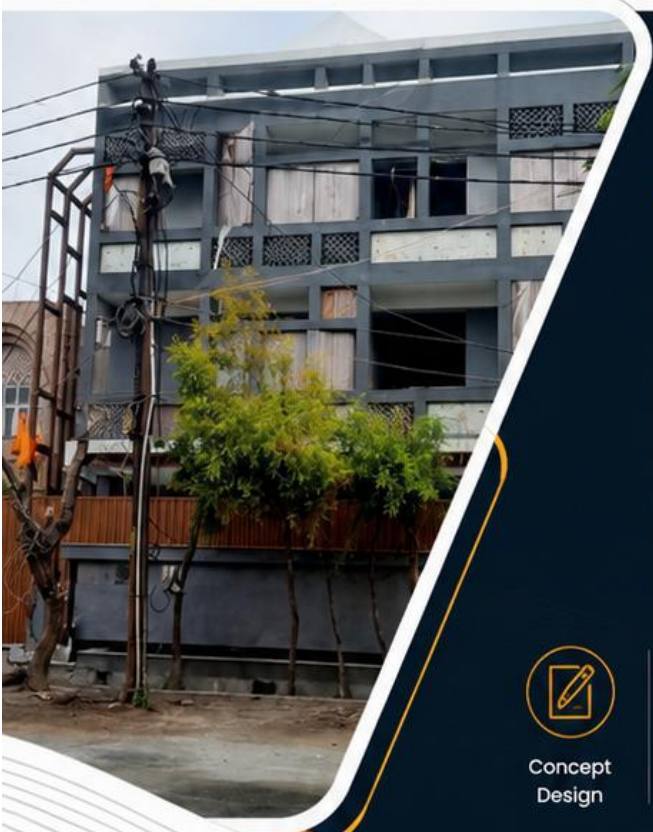

Authority Approvals

Bylaw Compliance

Ongoing Updates

03

## Construction

Our construction services experts provide clients with an extensive range of preconstruction and construction-related services and solutions for projects of varying scope, budget, schedule and complexity. Along with managing the complexity of each project, our construction services professionals build longstanding relationships with clients and design professionals. As an essential team member on each project, we play a crucial role in helping clients realize their visions.
